ABOUT ME

I am a passionate and detail-oriented Web Developer specializing in Python Django development, with expertise in WordPress customization and website optimization. With a strong enthusiasm for continuous learning, I thrive in dynamic environments that challenge my problem-solving skills and encourage growth. My goal is to contribute to innovative projects within large-scale companies while enhancing my technical expertise and expanding my professional network. I am always eager to learn new technologies and improve my skills to stay ahead in the fast-evolving world of web development.

WORK EXPERIENCE

April 2025 - present
Freelance

Web Developer

- Designed and developed dynamic websites using Django framework.
- Implemented user authentication and membership functionalities to enhance user engagement.
- Developed features for article sharing and a comment system to facilitate user interaction.

April 2025 - present
Freelance

Personal Website Development using WordPress

- Designed a user-friendly and responsive layout for optimal viewing on all devices.
- Integrated sections for resume display, contact forms, and social media links to facilitate easy communication.
- Customized WordPress themes and plugins to match professional branding and functionality needs.
