- My SQL - beginner
- PostgreSQL - beginner
- Flask - mid level
- Wordpres

LANGUAGES

- English (B2)
- Persian(native)
- Turkish(Basic)

PROFILE

Passionate and detail-oriented Python developer with strong expertise in Django and web technologies. Skilled at building efficient, scalable, and user-friendly web applications. Constantly learning and adapting to new technologies to deliver innovative solutions. Dedicated to writing clean, maintainable code and collaborating effectively in team environments.

WORK EXPERIENCE

Full stack online resturant
python/Django programming

- Developed a restaurant web application using Django, featuring a reservation system and a professional menu. Enhanced security is implemented through two-factor authentication using unique tokens sent via email, instead of Django's basic authentication.
  You can visit this code in my github:
  https://github.com/parhammohtasham/online-resturant
  https://github.com/parhammohtasham/ferygola_cafe

Full responsive Templates
Templates with HTML & Css & Sass

- I designed and built fully responsive HTML & CSS templates using techniques like flexbox, grid, and floats. These templates are responsive across mobile, tablet, and monitor sizes, and can be enhanced with JavaScript for added functionality.
  You can visit templates URLs in bellow:
  https://parhammohtasham.github.io/template-with-sass/
